## PATRIOT CONTAINER

# MANUAL CONTAINER TRANSPORTATION MADE EASY

- Robust steel construction
- Long lifetime with no maintenance
- NATO Codification
- Individual parts able to be reordered worldwide
- No tying down required
- Tie eyelets for rough terrain
- Foot-operated parking brakes on all wheels
- Capable of bearing a continuous load of up to 2,645 lbs (1,200 kg)
- Indoor and outdoor version
- Low transportation height
- Easy, lightweight steering and maneuverability
- Transport using 2 people
- 2 additional holding brakes
- May be transported using a forklift
- Maintenance-free wheels and brakes
- Transportation of oversized missile containers (i.e. AMRAAM, HARM, PATRIOT, SIDEWINDER)

### Surface Dimensions:

length: 45,27 inch (1,150 mm), width: 32,67 inch (830 mm)  
weight: 159 lbs (72 kg)

INDOOR

OUTDOOR

"Ever since we started using the Vogel Fluid-Systems transport support frame, we have been able to transport large containers for guided missiles within buildings without any problem."

Quote from Manager of the German Armed Forces
